

Completion App Source Code

Attached file: The final source code for the completion App.

How to run the Code:

1. Download the zip file and uncompress it then replace the OPENAI API in the .env file with your own API.
2. Open a terminal inside the root of the project folder.
3. Run "npm install".
4. Open a terminal inside the frontend folder.
5. Run "npm install".
6. Run "npm start" in both terminals and go to: <http://localhost:3000/>
